## **Continued gold mineralisation in drill results at Indochine's Mt Kare Gold/Silver Project, PNG**

### **2012 Drill Programme Results**

Best recently received results from a further 8 holes from the 2012 drill programme include:

#### *Drillhole 169SD12*

**17 metres (m) at 5.2 grams/tonne (g/t) gold, 30 g/t silver** from 27m downhole, including  
**7 m at 10.6 g/t gold, 62 g/t silver** from 36 m down hole, within the WRZ Zone.

#### *Drillhole 161SD12*

**6 m at 5.5 g/t gold, 95 g/t silver** from 6 m downhole within the BZ Zone.

#### *Drillhole 158SD12*

**97 metres at 1.5 g/t gold** from 31.7m downhole, including  
**4 m at 6.7 g/t gold, 30 g/t silver** from 51 m down hole, and  
**3 m at 5.9 g/t gold, 48 g/t silver** from 79 m downhole within the WRZ Zone.

#### *Drillhole 157SD12*

**76 metres at 1.5 g/t gold** from 26m downhole within the CZ Zone.

Encouraging wide intercepts of gold mineralisation in the Central Zone (CZ) reinforce potential for mineralised extensions.

Final drill results from 2012 drilling (4 holes) are expected to be released later in February.

### **Bonanza Zone Drill Programme**

Six drillholes were completed in a bonanza gold zone in the BZ Zone at Mt Kare, with first results due this week after the completion of check assays.

Drilling is currently underway on a separate bonanza gold zone within the WRZ Zone. Four drillholes have been completed.
