#### Names, qualifications, experience and special responsibilities

Ian W Ross Dip Bus (London), A.I.B (U.K.)

#### Chairman

Ian has a wealth of experience from working in the finance and mining industry for over 45 years in London, New York and Sydney. Since moving to Sydney in 1979 he has been involved at a senior executive level in the development of countless major mining developments in the Asian Region. Ian lived in China for 5 years during which time he incorporated his own mining company which was taken over by the Canadian entrepreneur Robert Friedland in 1992. Upon returning to Sydney, Ian continued to work directly for Robert Friedland in a range of senior executive roles in the Ivanhoe Group of Companies throughout the world until his retirement in 2005.

lan is a non-executive director of the ASX listed Union Resources Limited, and was non-Executive Chairman of the ASX listed Intec Limited until his retirement on 31 December 2007.

#### Gavan H Farley Dip Bus (F.I.T), Masters of Business Administration (Finance)

Gavan has a career spanning 30 years international management. Gavan is currently General Manager of Empire Securities Group and director of FCMS Holdings Inc of the USA. Previously, Gavan was Managing Director of Farley Laserlab USA Inc and Farley Europe Ltd. Gavan has held management positions in Hotels and Resorts.

Gavan is an executive director of ASX listed Pilbara Minerals Limited.

#### Stephen G Gemell BE (Mining) (Hons), FAusIMM(CP), MAIME, MMICA

Steve has 35 years of experience in the mining industry, involved with underground and open cut metalliferous mines and processing plants in project evaluation, feasibility study, and operating phases. Since 1984 he has been Principal of Gemell Mining Engineers and acts as an independent expert and technical auditor for mining companies and financial institutions on projects throughout Australasia, Oceania, Asia, Africa, Europe and the Americas.

Steve is a director of ASX listed Argent Minerals Limited, Eastern Iron Limited and Uxa Resources Limited.

As at the date of this report, the interests of the directors in the shares and options of Indochine Mining Limited were:

|                  | Number of Ordinary Shares | Number of Options over Ordinary<br>Shares |
|------------------|---------------------------|---|
| lan W Ross       | 500,000                   | 3,500,000                                 |
| Gavan H Farley   | 500,000                   | 2,000,000                                 |
| Stephen G Gemell | -                         | -   |

# DIVIDENDS

No dividends have been paid or declared during the financial year, nor do the directors recommend the declaration of a dividend.

### CORPORATE INFORMATION

Indochine Mining Limited is a company limited by shares that is incorporated and domiciled in Australia.

The registered office of the company is, Level 5, 2 Bligh Street, Sydney, NSW 2000.

### PRINCIPAL ACTIVITIES

The principal activities of the Group during the year was the exploration of mining tenements.

#### OPERATING AND FINANCIAL REVIEW

During the 2010 financial year the Group continued with the process of exploring its mining tenements and accordingly no revenue was derived other than interest income on cash held with financial institutions.

#### **OPERATING RESULTS FOR THE YEAR**

The loss profit after tax of the consolidated entity for the year ended 30 June 2010 was \$ 10,403,939 which included a shared based payment option expense of \$9,098,687.

# SIGNIFICANT CHANGES IN THE STATE OF AFFAIRS

During the year the consolidated entity and the company were established on 27 January 2010 with the view to listing the company on the Australian Securities Exchange. The company during March – April acquired previously stand alone companies Indochine Resources Limited, Indochine Resources (Cambodia) Limited, Asia Pacific Gold & Copper Limited, Asia Pacific Gold and Copper (Cambodia) Limited and Aries Limited through an intra group restructure. As a result, all these companies are now 100% owned subsidiaries of Indochine Mining Limited and accordingly this annual report reflects the consolidated accounts and stand alone accounts of Indochine Mining Limited. Furthermore, the company successfully listed on the Australian Securities Exchange by raising \$ 20,153,000 from retail and institutional investors in December 2010.

# SIGNIFICANT EVENTS AFTER THE BALANCE DATE

On 3 March 2011, Indochine Mining Limited (ASX: IDC) progressed its option to acquire the Mt Kare Gold Project in Papua New Guinea (PNG). The payment of approximately \$4 million by Indochine to Summit

Development Limited (*Summit*), a private PNG company, was made as a secured loan, as set out in the Company's announcement of 30 December 2010.

Subsequent to year end the company raised \$20,153,000 through IPO and by listing on the Australian Securities Exchange in December 2010.

### LIKELY DEVELOPMENTS AND EXPECTED RESULTS

Likely developments in the operations of the Group and the expected results of those operations in future financial years have not been included in this report as the inclusion of such information is likely to result in unreasonable prejudice to the Group.

### ENVIRONMENTAL REGULATION AND PERFORMANCE

The economic entity's operations are subject to significant environmental regulation in respect to its exploration activities. There have been no reports of breaches of environmental regulations during the financial year or to the date of this report.

### SHARE OPTIONS

The following options over ordinary shares in the Company has been granted to the directors. No shares have been issued during the financial year or since the end thereof by virtue of the exercise of any options.

|                | Number of Options<br>over Ordinary |  |
|----------------|------------------------------------|--|
| Directors      | Shares                             |  |
| lan W Ross     | 3,500,000                          |  |
| Gavan H Farley | 2,000,000                          |  |

# INDEMNIFICATION AND INSURANCE OF DIRECTORS AND OFFICERS

No indemnities have been given or insurance premium paid, during or since the end of the financial year, for any person who is or has been an officer of the Company.

#### DIRECTORS' MEETINGS

During the financial year, 3 meetings of directors were held. Attendances by each director during the year were as follows:

|                             | Number eligible to<br>attend Number attend |   |
|-----------------------------|--|---|
| Ian W Ross                  | 3  | 3 |
| Gavan H Farley              | 3  | 3 |
| David A Evans               | 3  | 3 |
| Ross M Hill (By invitation) | 3  | 3 |

### AUDITOR INDEPENDENCE

A copy of the auditor's independence as required under s 307 of the *Corporations Act 2001* is set out on page 6.

Signed in accordance with a resolution of the directors.

# AUDITOR'S INDEPENDENCE DECLARATION

As lead auditor for the audit of the financial report of Indochine Mining Limited for the year ended 30 June 2010, I declare that, to the best of my knowledge and belief, there have been no contraventions of:

- (i) the auditor independence requirements of the Corporations Act 2001 in relation to the audit; and
- (ii) any applicable code of professional conduct in relation to the audit.

# **INDEPENDENT AUDITOR'S REPORT**

# TO THE MEMBERS OF

# INDOCHINE MINING LIMITED

We have audited the accompanying financial report of Indochine Mining Limited ("the company"), which comprises the statement of financial position as at 30 June 2010, and the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, notes comprising a summary of significant accounting policies and other explanatory information and the directors' declaration.

### Directors' Responsibility for the Financial Report

The directors of the company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the financial report that is free from material misstatement, whether due to fraud or error. In Note 1, the directors also state, in accordance with Accounting Standard AASB 101 *Presentation of Financial Statements*, that the financial statements comply with *International Financial Reporting Standards*.

# Auditor's Responsibility

Our responsibility is to express an opinion on the financial report based on our audit. We conducted our audit in accordance with Australian Auditing Standards. These Auditing Standards require that we comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance about whether the financial report is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial report. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial report, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial report in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Chartered Accountants

#### Independence

In conducting our audit, we have complied with the independence requirements of the Corporations Act 2001.

Opinion

In our opinion:

- (a) the financial report of Indochine Mining Limited is in accordance with the *Corporations Act 2001*, including:
  - (i) giving a true and fair view of the company's financial position as at 30 June 2010 and of its performance for the year ended on that date; and
  - (ii) complying with Australian Accounting Standards and the Corporations Regulations 2001; and
- (b) the financial report also complies with International Financial Reporting Standards as disclosed in Note 1.

| Loans to related parties                            |      | -                  | (335,846)   |  |
| Net cash provided by (used in) financing activities |      | 5,938,864          | (334,846)   |  |
| Net increase/(decrease) in cash held                |      | (144,787)          | (5,166,854) |  |
| Cash at the beginning of the year                   |      | 1,192,649          | 6,121,742   |  |
| Foreign exchange translation difference             |      | (338,773)          | 237,761     |  |
| Cash at the end of the year                         | 7    | 709,089            | 1,192,649   |  |

# NOTE 1: STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES

The financial report of Indochine Mining Limited for the year ended 30 June 2010 was authorised for issue in accordance with a resolution of the directors on 14<sup>th</sup> March 2011.

Indochine Mining Limited is a company limited by shares incorporated and domiciled in Australia.

### **Basis of Preparation**

The financial report is a general purpose financial report that has been prepared in accordance with Australian Accounting Standards, Australian Accounting Interpretations, other authoritative pronouncements of the Australian Accounting Standards Board<sup>1</sup> and the *Corporations Act 2001*.

Australian Accounting Standards set out accounting policies that the AASB has concluded would result in a financial report containing relevant and reliable information about transactions, events and conditions to which they apply. Compliance with Australian Accounting Standards ensures that the financial statements and notes also comply with International Financial Reporting Standards. Material accounting policies adopted in the preparation of this financial report are presented below. They have been consistently applied unless otherwise stated.

The financial report has been prepared on an accruals basis and is based on historical costs, modified, where applicable, by the measurement at fair value of selected non-current assets, financial assets and financial liabilities.

### Principles of Consolidation

The consolidated financial statements incorporate the assets, liabilities and results of entities controlled by Indochine Mining Limited at the end of the reporting period. A controlled entity is any entity over which Indochine Mining Limited has the power to govern the financial and operating policies so as to obtain benefits from its activities. Control will generally exist when the parent owns, directly or indirectly through subsidiaries, more than half of the voting power of an entity. In assessing the power to govern, the existence and effect of holdings of actual and potential voting rights are also considered.

Where controlled entities have entered or left the Group during the year, the financial performance of those entities is included only for the period of the year that they were controlled. A list of controlled entities is contained in Note 21 to the financial statements.

In preparing the consolidated financial statements, all inter-group balances and transactions between entities in the consolidated group have been eliminated on consolidation. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with those adopted by the parent entity.

Non-controlling interests, being the equity in a subsidiary not attributable, directly or indirectly, to a parent, are shown separately within the equity section of the consolidated statement of financial position and statement of comprehensive income. The non-controlling interests in the net assets comprise their interests at the date of the original business combination and their share of changes in equity since that date.

#### **Business combinations**

Business combinations occur where an acquirer obtains control over one or more businesses and results in the consolidation of its assets and liabilities.

A business combination is accounted for by applying the acquisition method, unless it is a combination involving entities or businesses under common control. The acquisition method requires that for each business combination, one of the combining entities must be identified as the acquirer (ie parent entity). The business combination will be accounted for as at the acquisition date, which is the date that control over the acquiree is obtained by the parent entity. At this date, the parent shall recognise, in the consolidated accounts and subject to certain limited exceptions, the fair value of the identifiable assets acquired and liabilities assumed. In addition, contingent liabilities of the acquiree will be recognised where a present obligation has been incurred and its fair value can be reliably measured.

# NOTE 1: STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES

The acquisition may result in the recognition of goodwill or a gain from a bargain purchase. The method adopted for the measurement of goodwill will impact on the measurement of any non-controlling interest to be recognised in the acquiree where less than 100% ownership interest is held in the acquire.

The acquisition date fair value of the consideration transferred for a business combination plus the acquisition date fair value of any previously held equity interest shall form the cost of the investment in the separate financial statements. Consideration may comprise the sum of the assets transferred by the acquirer, liabilities incurred by the acquirer to the former owners of the acquiree and the equity interests issued by the acquirer.

Fair value uplifts in the value of pre-existing equity holdings are taken to the statement of comprehensive income. Where changes in the value of such equity holdings had previously been recognised in other comprehensive income, such amounts are recycled to profit or loss.

Included in the measurement of consideration transferred is any asset or liability resulting from a contingent consideration arrangement. Any obligation incurred relating to contingent consideration is classified as either a financial liability or equity instrument, depending on the nature of the arrangement. Rights to refunds of consideration previously paid are recognised as receivables. Subsequent to initial recognition, contingent consideration classified as equity is not remeasured and its subsequent settlement is accounted for within equity. Contingent consideration classified as an asset or a liability is remeasured each reporting period to fair value through the statement of comprehensive income, unless the change in value can be identified as existing at acquisition date.

All transaction costs incurred in relation to the business combination are expensed to the statement of comprehensive income.

#### Accounting Policies

#### a. Income Tax

The income tax expense (revenue) for the year comprises current income tax expense (income) and deferred tax expense (income).

Current income tax expense charged to the profit or loss is the tax payable on taxable income calculated using applicable income tax rates enacted, or substantially enacted, as at reporting date. Current tax liabilities (assets) are therefore measured at the amounts expected to be paid to (recovered from) the relevant taxation authority.

Deferred income tax expense reflects movements in deferred tax asset and deferred tax liability balances during the year as well unused tax losses.

Current and deferred income tax expense (income) is charged or credited outside profit or loss when the tax relates to items that are recognised outside profit or loss.

Deferred tax assets and liabilities are ascertained based on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred tax assets also result where amounts have been fully expensed but future tax deductions are available. No deferred income tax will be recognised from the initial recognition of an asset or liability, excluding a business combination, where there is no effect on accounting or taxable profit or loss.

Deferred tax assets and liabilities are calculated at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates enacted or substantively enacted at the end of the reporting period. Their measurement also reflects the manner in which management expects to recover or settle the carrying amount of the related asset or liability.

### NOTE 1: STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

#### a. Income Tax (continued)

Deferred tax assets relating to temporary differences and unused tax losses are recognised only to the extent that it is probable that future taxable profit will be available against which the benefits of the deferred tax asset can be utilised.

Where temporary differences exist in relation to investments in subsidiaries, branches, associates and joint ventures, deferred tax assets and liabilities are not recognised where the timing of the reversal of the temporary difference can be controlled and it is not probable that the reversal will occur in the foreseeable future.

Current tax assets and liabilities are offset where a legally enforceable right of set-off exists and it is intended that net settlement or simultaneous realisation and settlement of the respective asset and liability will occur. Deferred tax assets and liabilities are offset where a legally enforceable right of set-off exists, the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities, where it is intended that net settlement or simultaneous realisation and settlement of the respective asset and liability will occur in future periods in which significant amounts of deferred tax assets or liabilities are expected to be recovered or settled.

### b. Goods and Services Tax (GST)

Revenues, expenses and assets are recognised net of the amount of GST, except where the amount of GST incurred is not recoverable from the Tax Office. In these circumstances, the GST is recognised as part of the cost of acquisition of the asset or as part of an item of the expense. Receivables and payables in the statement of financial position are shown inclusive of GST.

Cash flows are presented in the statement of cash flows on a gross basis, except for the GST component of investing and financing activities, which are disclosed as operating cash flows

#### c. Property, Plant and Equipment

Each class of property, plant and equipment is carried at cost or fair value as indicated less, where applicable, any accumulated depreciation and impairment losses.

#### Plant and equipment

Plant and equipment are measured on the cost basis less depreciation and impairment losses.

The carrying amount of plant and equipment is reviewed annually by directors to ensure it is not in excess of the recoverable amount from these assets. The recoverable amount is assessed on the basis of the expected net cash flows that will be received from the assets' employment and subsequent disposal. The expected net cash flows have been discounted to their present values in determining recoverable amounts

The cost of fixed assets constructed within the consolidated group includes the cost of materials, direct labour, borrowing costs and an appropriate proportion of fixed and variable overheads.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the statement of comprehensive income during the financial period in which they are incurred.

#### Depreciation

The depreciable amount of all fixed assets including buildings and capitalised lease assets, but excluding freehold land, is depreciated on a straight-line basis over the asset's useful life to the consolidated group commencing from the time the asset is held ready for use. Leasehold improvements are depreciated over the shorter of either the unexpired period of the lease or the estimated useful lives of the improvements.

# NOTE 1: STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

# c. Property, Plant and Equipment (continued)

The depreciation rates used for each class of depreciable assets are:

| Class of Fixed Asset    | Depreciation Rate |
|-------------------------|-------------------|
| Computer Equipment      | 10% - 33%         |
| Furniture and Fittings: | 5% - 15%          |
| Improvements            | 5% - 10%          |
| Equipment               | 5% - 33%          |
| Motor Vehicles          | 6.67% - 15%       |
| Boat                    | 7.5%              |

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing proceeds with the carrying amount. These gains or losses are included in the statement of comprehensive income. When revalued assets are sold, amounts included in the revaluation surplus relating to that asset are transferred to retained earnings.

# d. Exploration and development expenditure

Exploration, evaluation and development expenditure incurred is accumulated in respect of each identifiable area of interest. These costs are only carried forward to the extent that they are expected to be recouped through the successful development of the area or where activities in the area have not yet reached a stage that permits reasonable assessment of the existence of economically recoverable reserves.

Accumulated costs in relation to an abandoned area are written off in full against profit in the year in which the decision to abandon the area is made.

When production commences, the accumulated costs for the relevant area of interest are amortised over the life of the area according to the rate of depletion of the economically recoverable reserves.

A regular review is undertaken of each area of interest to determine the appropriateness of continuing to carry forward costs in relation to that area of interest.

Costs of site restoration are provided over the life of the facility from when exploration commences and are included in the costs of that stage. Site restoration costs include the dismantling and removal of mining plant, equipment and building structures, waste removal, and rehabilitation of the site in accordance with clauses of the mining permits. Such costs have been determined using estimates of future costs, current legal requirements and technology on an undiscounted basis.

Any changes in the estimates for the costs are accounted on a prospective basis. In determining the costs of site restoration, there is uncertainty regarding the nature and extent of the restoration due to community expectations and future legislation. Accordingly the costs have been determined on the basis that the restoration will be completed within one year of abandoning the site.

#### e. Financial Instruments

**Recognition and Initial Measurement** 

Financial instruments, incorporating financial assets and financial liabilities, are recognised when the entity becomes a party to the contractual provisions of the instrument. Trade date accounting is adopted for financial assets that are delivered within timeframes established by marketplace convention.

# NOTE 1: STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Financial instruments are initially measured at fair value plus transactions costs where the instrument is not classified as at fair value through profit or loss. Transaction costs related to instruments classified as at fair value through profit or loss are expensed to profit or loss immediately. Financial instruments are classified and measured as set out below.

### Derecognition

Financial assets are derecognised where the contractual rights to receipt of cash flows expires or the asset is transferred to another party whereby the entity is no longer has any significant continuing involvement in the risks and benefits associated with the asset. Financial liabilities are derecognised where the related obligations are either discharged, cancelled or expire. The difference between the carrying value of the financial liability extinguished or transferred to another party and the fair value of consideration paid, including the transfer of non-cash assets or liabilities assumed is recognised in profit or loss.

### Classification and Subsequent Measurement

### (i) Financial assets at fair value through profit or loss

Financial assets are classified at 'fair value through profit or loss' when they are either held for trading for the purpose of short-term profit taking, derivatives not held for hedging purposes, or when they are designated as such to avoid an accounting mismatch or to enable performance evaluation where a group of financial assets is managed by key management personnel on a fair value basis in accordance with a documented risk management or investment strategy. Such assets are subsequently measured at fair value with changes in carrying value being included in profit or loss.

#### (ii) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and are subsequently measured at amortised cost.

Loans and receivables are included in current assets, except for those which are not expected to mature within 12 months after the end of the reporting period, which will be classified as non-current assets.

# (iii) *Held-to-maturity investments*

Held-to-maturity nvestments are non-derivative financial assets that have fixed maturities and fixed or determinable payments, and it is the Group's intention to hold these investments to maturity. They are subsequently measured at amortised cost.

Held-to-maturity investments are included in non-current assets, except for those which are expected to mature within 12 months after the end of the reporting period, which will be classified as current assets.

If during the period the Group sold or reclassified more than an insignificant amount of the held-tomaturity investments before maturity, the entire category of held-to-maturity investments would be tainted and would be reclassified as available-for-sale.

# (iv) Available-for-sale financial assets

Available-for-sale financial assets are non-derivative financial assets that are either not capable of being classified into other categories of financial assets due to their nature or they are designated as such by management. They comprise investments in the equity of other entities where there is neither a fixed maturity nor fixed or determinable payments.

Available-for-sale financial assets are included in non-current assets, except for those which are expected to be disposed of within 12 months after the end of the reporting period, which will be classified as current assets.

#### (v) Financial liabilities

Non-derivative financial liabilities (excluding financial guarantees) are subsequently measured at amortised cost.

### NOTE 1: STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

#### Fair value

Fair value is determined based on current bid prices for all quoted investments. Valuation techniques are applied to determine the fair value for all unlisted securities, including recent arm's length transactions, reference to similar instruments and option pricing models.

#### Impairment

At the end of the reporting period, the Group assesses whether there is objective evidence that a financial instrument has been impaired. In the case of available-for-sale financial instruments, a prolonged decline in the value of the instrument is considered to determine whether an impairment has arisen. Impairment losses are recognised in the statement of comprehensive income.

#### Financial Guarantees

Where material, financial guarantees issued, which require the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due, are recognised as a financial liability at fair value on initial recognition. The guarantee is subsequently measured at the higher of the best estimate of the obligation and the amount initially recognised less, when appropriate, cumulative amortisation in accordance with AASB 118 Revenue. Where the entity gives guarantees in exchange for a fee, revenue is recognised under AASB 118.

The fair value of financial guarantee contracts has been assessed using the probability weighted discounted cash flow approach. The probability has been based on:

- the likelihood of the guaranteed party defaulting in a year's period;
- the proportion of the exposure that is not expected to be recovered due to the guaranteed party defaulting; and
- the maximum loss exposed if the guaranteed party were to default.

#### g. Impairment of Assets

At the end of each reporting period, the Group assesses whether there is any indication that an asset may be impaired. The assessment will include considering external sources of information and internal sources of information including dividends received from subsidiaries, associates or jointly controlled entities deemed to be out of pre-acquisition profits. If such an indication exists, an impairment test is carried out on the asset by comparing the recoverable amount of the asset, being the higher of the asset's fair value less costs to sell and value in use to the asset's carrying value. Any excess of the asset's carrying value over its recoverable amount is expensed to the statement of comprehensive income.

Where it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Impairment testing is performed annually for goodwill and intangible assets with indefinite lives.

#### h. Foreign Currency Transactions and Balances

#### Functional and presentation currency

The functional currency of each group entity is measured using the currency of the primary economic environment in which that entity operates. The consolidated financial statements are presented in Australian dollars which is the parent entity's functional and presentation currency.

#### **Transaction and balances**

Foreign currency transactions are translated into functional currency using the exchange rates prevailing at the date of the transaction. Foreign currency monetary items are translated at the yearend exchange rate. Non-monetary items measured at historical cost continue to be carried at the exchange rate at the date of the transaction. Non-monetary items measured at fair value are reported at the exchange rate at the date when fair values were determined.

### NOTE 1: STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Exchange differences arising on the translation of monetary items are recognised in the statement of comprehensive income, except where deferred in equity as a qualifying cash flow or net investment hedge.

Exchange difference arising on the translation of non-monetary items are recognised directly in equity to the extent that the gain or loss is directly recognised in equity, otherwise the exchange difference is recognised in the statement of comprehensive income.

#### Group companies

The financial results and position of foreign operations whose functional currency is different from the Group's presentation currency are translated as follows:

- Assets and liabilities are translated at year-end exchange rates prevailing at that reporting date.
- Income and expenses are translated at average exchange rates for the period.
- Retained earnings are translated at the exchange rates prevailing at the date of the transaction.

Exchange differences arising on translation of foreign operations are transferred directly to the Group's foreign currency translation reserve in the statement of financial position. These differences are recognised in the statement of comprehensive income in the period in which the operation is disposed.

#### i. Employee Benefits

Provision is made for the company's liability for employee benefits arising from services rendered by employees to the end of the reporting period. Employee benefits that are expected to be settled within one year have been measured at the amounts expected to be paid when the liability is settled. Employee benefits payable later than one year have been measured at the present value of the estimated future cash outflows to be made for those benefits. In determining the liability, consideration is given to employee wage increases and the probability that the employee may not satisfy vesting requirements. Those cash flows are discounted using market yields on national government bonds with terms to maturity that match the expected timing of cash flows.

### j. Provisions

Provisions are recognised when the Group has a legal or constructive obligation, as a result of past events, for which it is probable that an outflow of economic benefits will result and that outflow can be reliably measured.

Provisions are measured using the best estimate of the amounts required to settle the obligation at the end of the reporting period.

### k. Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less, and bank overdrafts. Bank overdrafts are shown within short-term borrowings in current liabilities on the statement of financial position.

# I. Revenue and Other Income

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the group and the revenue can be reliably measured

Interest revenue is recognised using the effective interest rate method, which for floating rate financial assets is the rate inherent in the instrument. Dividend revenue is recognised when the right to receive a dividend has been established.

All revenue is stated net of the amount of goods and services tax (GST).

### NOTE 1: STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

#### m. Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of assets that necessarily take a substantial period of time to prepare for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use of sale.

All other borrowing costs are recognised in income in the period in which they are incurred.

#### n. Trade and Other Payables

Trade and other payables represent the liability outstanding at the end of the reporting period for goods and services received by the Group during the reporting period, which remain unpaid. The balance is recognised as a current liability with the amounts normally paid within 30 days of recognition of the liability.

#### o. Equity-settled compensation

The Group operates equity-settled share-based payment employee share and option schemes. The fair value of the equity to which employees become entitled is measured at grant date and recognised as an expense over the vesting period, with a corresponding increase to an equity account. The fair value of shares is ascertained as the market bid price. The fair value of options is ascertained using a Black–Scholes pricing model which incorporates all market vesting conditions. The number of shares and options expected to vest is reviewed and adjusted at the end of each reporting date such that the amount recognised for services received as consideration for the equity instruments granted shall be based on the number of equity instruments that eventually vest.

#### p. Comparative Figures

When required by Accounting Standards, comparative figures have been adjusted to conform to changes in presentation for the current financial year.

The company was formed on 27 January 2010. A group restructure transaction was entered into on 3 March 2020 whereby Indochine Mining Limited acquired Indochine Resources Limited and its subsidiaries. This was an intra group transaction the effects of which have been eliminated on consolidation. The comparative figures provided in these financial statements are those of Indochine Resources Limited with the Indochine Mining Limited financial statements effectively representing a continuation of the Indochine Resources Limited group of companies.

#### q. Critical Accounting Estimates and Judgements

The directors evaluate estimates and judgements incorporated into the financial report based on historical knowledge and best available current information. Estimates assume a reasonable expectation of future events and are based on current trends and economic data, obtained both externally and within the company.

In the opinion of the directors, there are no key assumptions or sources of estimation uncertainty that have a risk of causing a material adjustment to the carrying amount of certain assets and liabilities within the next reporting period.

#### Exploration and evaluation expenditure

This policy requires management to make certain estimates and assumptions as to future events and circumstances, in particular whether economically viable extraction operations are viable where reserves have been discovered and whether indications of impairment exist. Any such estimates and assumptions may change as new information becomes available.

### NOTE 1: STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

#### **Development expenditure**

Judgement is applied by management in determining when a project has reached a stage at which economically recoverable reserves exist and that development may be sanctioned. Management is required to make certain estimates and assumptions similar to those described above for capitalised exploration and evaluation expenditure. Judgement is also applied by management in determining which costs are directly attributable to the exploration assets. Critical estimates are made in respect of the percentage time that management and other employees spend in the development of the various assets. While management used their best judgement in this regard, there remains a degree of estimation uncertainty surrounding the allocation of costs to the various assets.

### New Accounting Standards for Application in Future Periods

| Reference      | Title  | Summary   | Application<br>date (financial<br>years<br>beginning) | Expected Impact                        |

#### Capital Management

Management controls the capital of the Group in order to maintain a good debt to equity ratio, provide the shareholders with adequate returns and ensure that the Group can fund its operations and continue as a going concern.

The Group's debt and capital includes ordinary share capital and financial liabilities, supported by financial assets.

There are no externally imposed capital requirements.

Management effectively manages the Group's capital by assessing the Group's financial risks and adjusting its capital structure in response to changes in these risks and in the market. These responses include the management of debt levels, distributions to shareholders and share issues.

|                                      |      | 2010      | 2009    |

#### **Financial Risk Management Policies**

The directors' overall risk management strategy seeks to assist the company in meeting its financial targets, whilst minimising potential adverse effects on financial performance. Risk management policies are approved and reviewed by the Board of Directors on a regular basis. These include the credit risk policies and future cash flow requirements.

The main purpose of non-derivative financial instruments is to raise finance for company operations. The company does not have any derivative instruments at 30 June 2010.

#### **Specific Financial Risk Exposures and Management**

The main risks the Group is exposed to through its financial instruments are credit risk, liquidity risk and market risk relating to interest rate risk.

#### a) Credit risk

Given the group does not hold trade debtors they are not exposed to credit risk.

#### b) Market risk and interest rate risk

The group does not hold any listed equity instruments or interest bearing liabilities and thus are not exposed to any market risk relating to interest rate risk

#### c) Liquidity risk

Liquidity risk arises from the possibility that the Group might encounter difficulty in settling its debts or otherwise meeting its obligations related to financial liabilities. The Group manages this risk through the following mechanisms:

- preparing forward-looking cash flow analysis in relation to its operational, investing and financing activities;
- obtaining funding from a variety of sources;
- maintaining a reputable credit profile;
- managing credit risk related to financial assets; and
- comparing the maturity profile of financial liabilities with the realisation profile of financial assets.

The tables below reflect an undiscounted contractual maturity analysis for financial liabilities. Cash flows realised from financial assets reflect management's expectation as to the timing of realisation. Actual timing may therefore differ from that disclosed

Financial liability and financial asset maturity analysis

# NOTE 19: RELATED PARTY TRANSACTIONS

Transactions with wholly owned entities

During the year ended 30 June 2010, the company lent an additional \$1,731,588 to its wholly owned subsidiary as an interest free loan. The balance of the loan to its subsidiary as at 30 June 2010 is \$6,515,002. The directors have considered the recoverability of this loan and have recognised \$3,828,398 impairment provision against the carrying value. The loan will bear no interest until the subsidiary enters into the exploitation stage.

# NOTE 20: SEGMENT REPORTING

The company operates predominantly mining exploration and development industry, predominantly within Cambodia and Laos.
